Achievement EHCP TARGET progression mapping

Pattern & Statistics Strand Overview

The pattern and statistics strand focuses on developing pupils' ability to recognise, create and reason about patterns, and begins to introduce the organisation and interpretation of information. It starts with engagement in repeated actions and predictable sequences, progressing to recognising pattern rules and creating more complex patterns. At later stages, pupils begin to sort, organise and compare groupings, forming the foundation for statistical understanding.

Why is it important?

Pattern supports prediction and reasoning, and mathematical structure.

Statistics supports organising information, and comparing and interpreting data.

Without this - pupils may struggle to identify patterns, predict outcomes or organise information

With it - pupils can recognise structure, explain patterns and begin to interpret grouped information

Pathway Aim

By the end of the pathway, pupils will be able to recognise, create and explain patterns, and begin to organise and compare groups of information in meaningful ways.

Example Evidence Statements

"The pupil sorts objects into groups and counts how many are in each."

"They compare groups using language such as 'more' and 'fewer'."

"They identify patterns within grouped data."

Pattern Awareness & Anticipation (Bands 1–3) Pupils experience repeated patterns through sensory and interactive activities, developing	**Repeating Patterns & Creation (Bands 4–5)** Pupils recognise and create simple repeating patterns and begin to understand pattern structure.	**Pattern Rules & Generalisation (Band 6)** Pupils identify pattern rules, create more complex patterns and begin to generalise pattern structure.	**Pattern Application & Early Data Representation (Band 7)** Pupils apply pattern understanding to sorting, grouping and comparing, beginning to develop early statistical thinking.

awareness of predictability and sequence.			
Key stage Target By the end of the key stage, the pupil will demonstrate awareness of repeated patterns through anticipation, engagement and response.	**Key stage Target** By the end of the key stage, the pupil will recognise, continue and create simple repeating patterns.	**Key stage Target** By the end of the key stage, the pupil will identify, extend and explain pattern rules in a range of contexts.	**Key stage Target** By the end of the key stage, the pupil will organise objects into groups, compare them and describe patterns within data.
Typical evidence might include: joining in repeated actions or rhythms anticipating familiar sequences repeating actions or arrangements showing recognition of routines	**Typical evidence might include:** continuing a given pattern creating simple repeated sequences using colours, objects or actions in patterns identifying what repeats	**Typical evidence might include:** explaining what is repeating in a pattern extending patterns beyond immediate examples recognising patterns in real-life contexts creating non-trivial patterns	**Typical evidence might include:** grouping objects by category or feature counting items within groups comparing group sizes describing simple data representations
Mapped curriculum targets **Band 1** Show interest in patterned songs and rhymes Experience repeated actions and images Begin to predict what happens next **Band 2** Join in repeated patterns in songs Repeat and continue actions **Band 3** Recognise patterns in routines Anticipate what comes next Begin to create simple patterns (e.g. lining up toys	**Mapped curriculum targets** **Band 4** Anticipate repeated sound and action patterns **Band 5** Create simple patterns Explore repeating patterns (e.g. AB, ABC) Join in pattern-based activities	**Mapped curriculum targets** **Band 6** Identify pattern rules Spot patterns in the environment Create more complex repeating patterns	**Mapped curriculum targets** **Band 7** Make and identify patterns Identify shapes within patterns Predict outcomes when shapes are combined Sort objects into groups Say how many are in each group Compare groups using language such as more, less or same

Achievement EHCP TARGET progression mapping

Next Step: Begin to create and recognise simple repeating patterns	**Next Step:** Identify and explain pattern rules and create more complex patterns	**Next Step:** Begin to organise objects into groups and compare them	**Next Step:** Represent, organise and interpret data using structured methods (Statistics – Celebration)
