New Siblands School

Mathematics - Number Curriculum

Learning bands 1–3: Belonging (Pre-formal Maths) **Mathematics Number**

Learning bands	Pre-formal Maths
1	• I can react to changes in amount when they are significant (e.g. more than double) • I can respond to objects appearing or disappearing • I can notice when something has been added or taken away • I can show anticipation when more objects are presented • I can attend to objects being moved or changed • I can demonstrate awareness of “more” through looking, reaching or vocalising
2	• I can show an awareness of number names through songs and rhymes • I can look for things that have moved out of sight • I can follow objects or sounds as they are counted or moved • I can respond to words like more • I can link number words to objects • I can anticipate when more items are added • I can respond differently to one object and many objects
3	• I can say some number names • I can use counting-like behaviours such as pointing or making sounds • I can use number words like one or two when pointing to objects • I can sometimes give one or two objects when asked • I can combine small groups and notice there are more • I can notice when a group becomes bigger or smaller • I can begin to match one object to another • I can attempt to count objects with support

Band	Comparison	Counting	Cardinality	Composition
4	• I can begin to compare groups • I can use language such as more, same and different • I can notice when groups change • I can compare two groups by matching objects	• I can say numbers in order with support • I can begin to use a stable counting sequence • I can join in with counting songs consistently	• I can take or give two or three objects • I can notice numerals • I can count using objects or fingers • I can say how many after counting with support	• I can combine groups • I can separate groups and notice changes • I can join and separate objects with support
5	• I can compare groups up to 5 • I can match objects to compare • I can identify which group has more • I can identify when groups are equal • I can identify which group has fewer	• I can count up to 5 objects accurately • I can use one number for each object • I can count objects in different arrangements • I can stop counting at the correct number	• I can understand the last number tells how many • I can match numerals to quantities up to 5 • I can represent numbers using objects or marks • I can recount to check • I can select a number of objects when asked (up to 5)	• I can recognise numbers are made of parts • I can partition numbers within 5 • I can combine and separate numbers • I can show numbers in different ways
6	• I can compare quantities up to 10 • I can identify more and fewer • I can begin to estimate • I can compare without counting by using grouping or matching	• I can count forwards to 10 • I can count backwards from 5 • I can recognise numerals to 10 • I can count out loud and keep track of objects	• I can count out up to 10 objects • I can match numerals to quantities • I can understand rearranging does not change total • I can explain how I know how many	• I can partition numbers within 10 • I can add and subtract 1 • I can record using marks • I can represent addition and subtraction using objects
7	• I can compare quantities • I can use greater than, less than, equal to • I can explain comparisons • I can order more than two groups or numbers	• I can count forwards and backwards to 20 • I can count accurately in different arrangements • I can recognise patterns • I can start counting from a given number	• I can subitise up to 5 • I can recognise quantities without counting • I can subitise familiar arrangements quickly	• I can use part–part–whole models • I can recall some number bonds • I can solve simple problems • I can explain how numbers are composed and decomposed

Band	Place Value	Fractions	Multiplication and Division	Addition and Subtraction
8	• I can understand teen numbers as 10 and some more • I can represent numbers using objects, pictures and number lines • I can compare quantities within 10 • I can order numbers within 20	• I can recognise and find halves and quarters • I can share equally • I can explain equal parts • I can identify equal and unequal groups	• I can solve one-step problems using grouping • I can use arrays • I can represent multiplication and division • I can make equal groups	• I can add and subtract within 10 • I can use objects and number lines • I can use +, − and = symbols • I can represent addition and subtraction using pictures
9	• I can recognise place value of digits in two-digit numbers • I can read and write numbers to 100 • I can represent numbers using objects, pictures and number lines • I can estimate on a number line • I can compare and order numbers using <, > and = • I can use place value to solve problems • I can partition two-digit numbers into tens and ones	• I can recognise, find and name halves and quarters • I can write simple fractions (e.g. 1/2 of 6 = 3) • I can recognise equivalence such as 2/4 = 1/2 • I can represent fractions using drawings • I can solve problems involving fractions • I can find fractions of quantities using objects	• I can recall multiplication and division facts for 2, 5 and 10 • I can calculate using ×, ÷ and = • I can use arrays and repeated addition • I can explain commutativity of multiplication • I can solve problems in context • I can recognise odd and even numbers	• I can solve problems using objects and pictorial representations • I can recall addition and subtraction facts to 20 • I can add and subtract two-digit numbers (with ones and tens) • I can use number lines • I can use inverse operations to check answers • I can solve missing number problems
10	• I can recognise place value of digits in three-digit numbers • I can read and write numbers to 1000 • I can represent numbers in different ways including number lines • I can compare and order numbers to 1000 • I can use place value to solve problems • I can partition numbers into hundreds, tens and ones	• I can count in tenths • I can recognise tenths as dividing into 10 equal parts • I can recognise, find and write fractions • I can recognise equivalent fractions • I can compare and order fractions • I can solve problems involving fractions • I can add and subtract fractions with the same denominator	• I can recall multiplication facts including 3, 4 and 8 • I can calculate using known facts • I can multiply two-digit numbers by one digit • I can solve scaling and correspondence problems • I can solve missing number problems	• I can add and subtract three-digit numbers mentally • I can use formal written methods • I can estimate answers • I can use inverse operations • I can solve multi-step problems
